

Graphium

Natural Habitats *Dung • Seeds • Soils • Woody plant tissue*

Suitable Substrates in the Indoor Environment *Unknown*

Water Activity *Unknown*

Mode of Dissemination *Beetles when mitosporic state of Ophiostoma ulmi*

Allergenic Potential *Unknown*

Potential Opportunist or Pathogen *Unknown*

Industrial Uses *R135402, a compound with antifungal activity against Candida albicans and Cryptococcus neoformans, has been isolated from a fermentation broth of Graphium putredinis*

Potential Toxins Produced *Unknown*

Other Comments *There have not been any reports of human infections with Graphium species, however, it is a mitosporic state of Pseudoallescheria boydii which causes subcutaneous mycoses in man*
