August 26, 2016

Dear Valued Customer:

EMSL Analytical, Inc. labs and LA Testing labs maintain NVLAP accreditations which satisfy all state requirements for the analysis of asbestos in the state of Arizona. Our analysts participate in proficiency rounds internally, as well as externally, in order to maintain the highest of standards for our customers.

As per the Arizona Department of Health and Safety, no additional certification is required by the state, as long as the laboratories meet the following criteria:

“Pursuant to A.R.S. § 36-495.02 (A), laboratories are exempt for licensure by the department if they are accredited by the national voluntary laboratory accreditation program (NVLAP) administered by the National Institute of Standards and Technology (NIST) and approved by the department.”

Please see the NVLAP accreditations section of this website to view the certificates for all EMSL Analytical, Inc., and LA Testing labs.

Susan M. Harding  
Corporate Quality Control Administrator  
EMSL Analytical, Inc.
