Laboratory Director & QA/QC Manager

RE: Delaware Approval

Dear Laboratory Director:

The Delaware Office of Drinking Water (ODW) is required to establish the certification of out-of-state laboratories that perform analysis on drinking water compliance samples from the state of Delaware. Based on the submitted documents, EMSL Analytical, Inc., located at 200 Route 130 North, Cinnaminson, NJ 08077, is approved to do compliance work in the state of Delaware for the approved drinking water analytes listed on the New Jersey certificate that expires on June 30, 2019. This approval is valid for the same time period as the New Jersey certification.

For renewal of this approval, the Delaware ODW requires:

- Copy of the home state or NELAP certificate for drinking water analysis listing approved analytes and methods
- Copy of the last two annual proficiency tests listing analytes and methods
- Copy of the quality assurance manual
- Proof of the Delaware public water system client or drinking water laboratory
- Letter within 30 days of any changes in:
 - Major personnel
 - Major equipment
 - Name, location or owner

When any changes or updates are made to the above requirements, copies need to be submitted to the address below. If you have any questions contact me at 302-741-8595 or brenda.haire@state.de.us

Sincerely,

A handwritten signature in black ink that reads "Brenda Haire".
