0990-4	2013-July 9-01	Arm- Adam	1 Tick	Present	

Interpretation Key	
	<i>Borrelia burgdorferi</i> detected.
	<i>Borrelia burgdorferi</i> not detected.

Disclaimers for Tick-Borne Pathogen Tests:

This report contains analytical results only, and does not constitute medical advice regarding the samples reported therein. Clients and other users of this report are directed to consult a medical professional for an interpretation of the test results. EMSL's sole responsibility is to perform analysis based upon the testing parameters requested by the Client, and expressly disclaims any warranty of merchantability or fitness for specific purpose, and all liability for indirect, special, consequential or incidental damages, regardless of the negligence (either sole or concurrent) of EMSL, arising out of or in connection with EMSL's services there under or the delivery, use, reliance upon or interpretation of test results by Client or any third party. EMSL accepts no legal responsibility for the purposes for which the Client uses the test results. EMSL will not be held responsible for improper tick specimen collection. The tick specimen collector has the sole responsibility to ensure that a valid sample is collected for analysis. In no event shall EMSL be liable to a Client or any third party, whether based upon theories of tort, contract or any other legal or equitable theory, in excess of the amount paid to EMSL by Client there under.
